Professional Profile

IN, VAS & MFS Engineer, full-stack developer and digital solutions consultant with experience in the design, architecture, development and deployment of institutional and business-oriented digital platforms. Strong skills in functional analysis, technical specification writing, backend architecture, REST APIs, databases, application security, dashboards, user management, quality control and digital project management. Able to produce structured technical deliverables, work remotely with multidisciplinary teams and support the full lifecycle of a digital project, from needs analysis to technical validation.

APPLICATION OBJECTIVE

To contribute expertise in digital solution architecture, functional analysis, technical requirements writing, application security and technical audit to the UNFPA Congo TICTACADOS mission, focused on the technical and functional structuring of a digital solution for adolescents and young people.

KEY COMPETENCIES FOR THE TICTACADOS MISSION

Area	Competencies
Analysis & scoping	Functional analysis, requirements gathering, terms of reference/technical specifications, acceptance criteria and technical documentation.
Digital architecture	Frontend, backend, REST APIs, databases, user roles, integrations and deployment.
Development	React, JavaScript, Node.js, Express, WordPress, MySQL/PostgreSQL databases, dashboards and administration interfaces.
Application security	Authentication, role management, sessions, secure cookies, CORS, API security and backend best practices.
Quality & audit	Functional testing, technical review, debugging, compliance checks, anomaly analysis and corrective recommendations.
UX/UI & end users	Design of professional, accessible and structured interfaces adapted to varied user groups.
Data & reporting	Data analysis, report automation, file reconciliation, KPIs and dashboards.
Project management	Planning, deliverable tracking, remote coordination, synthesis and reporting.

RELEVANT EXPERIENCE AND PROJECTS

Freelancer Consultant - Developer / Technical Architect - SNRC Project | *Period: March 2026 to Present*
Société Nationale de Recouvrement des Créances du Tchad - www.snrc.td

- Structured an institutional platform using React, Node.js/Express, PostgreSQL, REST APIs and an administration interface.
- Implemented modules for managing pages, news, publications, FAQs, institutional settings and messages.
- Carried out application security work: CORS, authentication, cookies, protected endpoints, deployment and technical supervision.

Freelancer Consultant - Developer / Digital Consultant - Eden Business Center | *Period: January 2026 to Present*
Showcase, administration and online sales platform - www.eden-businesscenter.org

- Implemented a platform with product management, gallery, statistics and superadmin authentication.
- Developed the Node.js/Express backend, MySQL database, APIs and production deployment.

Full-Stack Developer - Harvest Center Project | *Period: April 2025 to Present*
Educational and institutional platform - www.harvestcentertd.org

- Developed a platform covering users, roles, teachers, students, enrolments, training programs, content and opportunities.
- Designed a Node.js/Express backend with MySQL database, authentication, session management and protected routes.
- Contributed to FR/EN internationalization and improved the user experience on public and administrative pages.

Freelance Consultant - Digital Solutions Development | *Period: September 2024 to Present*
CDO - Chad - www.cdotchad.com

- Designed and developed complete web platforms with frontend, backend, APIs, databases and administration interfaces.
- Drafted functional and technical specifications to structure business needs and guide development work.
- Implemented authentication systems, role management, dashboards, content modules and administrative features.
- Provided deployment and technical support in production environments, including cPanel/Passenger, with application incident resolution.

Partner & Consultant - Digital Solutions Development | *Period: September 2024 to Present*
ToBeMalko (2BM) - Chad - www.2bemalko.com

- Frontend development with React and JavaScript: dynamic and high-performance user interfaces with React and Material UI; responsive design, SEO optimization and UX best practices.
- Backend APIs: designed and implemented REST and GraphQL APIs with Node.js and PHP, connected to PostgreSQL for client, content and transaction management.
- Implemented authentication systems, role management, dashboards, content modules and administrative features.
- Provided deployment and technical support in production environments, including cPanel/Passenger, with application incident resolution.

Senior IN, VAS & MFS Consultant / Data Analyst & Project Manager | *Period: July 2023 to Present*
Telecommunications and digital services

- Analyzed and reconciled files collected from mobile network operators.
- Automated reports, structured data, monitored indicators and supported operational decision-making.
- Coordinated technical activities, tracked anomalies, documented findings and contributed to continuous process improvement.

Facilitator Consultant - Digital Marketing Training | *Period: 2025 - 2026*
SESA - IRC in Consortium (EU Programme) | Burundi

- Delivered training programs integrating digital tools and monitoring systems.
- Supported participant monitoring and program performance control.
- Contributed to data reporting and program evaluation processes.

Secure Platform and MEAL Consultant | *Period: 2021*
FAO - Chad

- Designed MEAL frameworks and information management plans.
- Developed data collection tools and monitoring indicators.
- Managed program databases for beneficiary monitoring and reporting.
- Produced Power BI dashboards for program monitoring and donor reporting.

Specialized Enumerator - Food Security | *Period: 2019 - 2020*
Ministry of Agriculture / World Food Programme / FAO / UNICEF - Chad

- Conducted food security assessments and data collection missions.
- Ensured data validation and quality control.
- Prepared datasets for analysis and reporting in humanitarian contexts.

Partner and Technical Project Manager | *Period: 2021 - 2023*
SALY SYSTEM - Digital application development startup - Chad

- Led the design and implementation of data systems and dashboards.
- Managed ICT and data projects for performance monitoring and reporting.
- Produced KPI analyses and business intelligence reports.

Founder and Executive Director | *Period: 2017 to Present*
Digital Business Services - Digital application development startup and diversified services - Chad

- Founded and managed a consulting firm providing data-driven solutions for SMEs.
- Designed digital transformation and monitoring systems.
- Developed organizational performance monitoring frameworks.

BI Analyst, Revenue Assurance, Interconnection, Business Development and Acquisition Support | *Period: 2012 - 2017*
Millicom Tigo - Chad

- Developed SQL-based reporting systems and dashboards.
- Automated data analysis and anomaly detection processes.
- Supported performance monitoring and risk mitigation.

SELECTED ACHIEVEMENTS

- Designed full web architectures combining frontend, backend, databases, authentication and administration.
- Drafted technical content, implementation plans, scoping documents and structured proposals.
- Improved application quality through diagnosis, testing, error correction, access management and API flow security.
- Implemented professional interfaces for end users, institutions, administrators and business managers.

ACADEMIC BACKGROUND

Degree / Program	Institution	Year
Master's Degree in Computer Methods Applied to Business Management (MIAGE)	USTTB - Bamako, Mali	2010
DUT in Management Information Systems	USTTB - Bamako, Mali	2007

ADDITIONAL TRAINING, CERTIFICATIONS AND ATTESTATIONS

Training / Certification	Organization	Year	Status
Project Management Professional (PMP) Certification	PMI	2025	Completed
MEAL Fundamentals	DisasterReady	2025	Completed
Data Analysis with Excel, SPSS and Power BI	CCL - Morocco	2024	Completed
Full Stack Web Development (React, JavaScript, Node.js, Web3)	Udemy	2025 - 2026	In progress
AI Expertise (ChatGPT, Claude, Midjourney, Jasper, Stable Diffusion, DeepSeek)	Cousiv	2025 - 2026	Completed

TOOLS AND TECHNOLOGIES

React, JavaScript, Node.js, Express, WordPress, SQL Server, MySQL, PostgreSQL, REST APIs, Git, cPanel, Passenger, Power BI, Excel, reporting tools and technical documentation.
