PROFILE

Data Analyst with over 10 years of experience in data analysis, financial reporting and performance indicator monitoring, including proven expertise in Revenue Assurance and transactional data reconciliation at a telecom operator (Millicom Tigo) and a digital financial services provider (Airtel Money). Direct experience in data reconciliation (logic similar to bank reconciliation), variance tracking, Power BI dashboard production, reporting automation and anomaly detection in high-volume transactional environments. PMP certified, proficient in Excel, SQL, Power BI, Python and R, and accustomed to the rigor, traceability and regulatory compliance requirements specific to regulated financial sectors.

KEY SKILLS

- **Financial Analysis & Reporting:** revenue, expense and variance tracking, periodic reporting (monthly/quarterly/annual), management reporting
- **Data Reconciliation:** multi-source file matching, consistency control, anomaly detection and documentation (Revenue Assurance)
- **Business Intelligence:** Power BI (dashboard design and maintenance, DAX measures), advanced Excel (pivot tables, complex formulas, VBA macros)
- **Databases & Querying:** SQL (MySQL, PostgreSQL, SQL Server), data structuring and extraction
- **Quantitative Analysis:** Python, R, report automation, performance indicators (KPIs)
- **Compliance & Regulated Environment:** KYC/AML, financial services regulatory requirements, data confidentiality management
- **Project Management:** PMP certified, coordination of technical and business teams, deadline management

PROFESSIONAL EXPERIENCE

Senior Consultant – Data Analyst, Reporting & Data Reconciliation *July 2023 – Present*
Digital Financial Services sector (Mobile Money), Bujumbura, Burundi

- Reconciliation of multi-operator transactional files — data matching, consistency and traceability control, logic equivalent to bank reconciliation.
- Production and automation of periodic reporting: data structuring, KPI tracking, support for operational decision-making and management reporting.
- Design of DAX measures and indicators for Power BI dashboards; automation of Excel reports via VBA macros to reduce production timelines.
- Identification, documentation and tracking of variances and anomalies, in line with regulatory compliance requirements (KYC/AML) for transactional environments.
- Coordination of technical and business teams to strengthen control processes and improve report production timelines.

BI Analyst – Revenue Assurance, Interconnection, Business Development *2012 – 2017*
Millicom Tigo, Chad

- Developed SQL-based reporting systems and dashboards to track revenue and performance.
- Automated data analysis and anomaly detection (Revenue Assurance) — identifying financial discrepancies and revenue leakage.
- Supported financial performance monitoring and operational risk management.

Independent Consultant – Functional Analysis & Digital Solutions *2017 – Present*
Various clients (Chad, remote)

- Design of organizational performance monitoring systems and dashboards for SMEs and institutions.
- Requirements gathering, functional specifications and project coordination for data management platforms.

Secure Platform & MEAL Consultant *2021*

FAO Chad

- Design of monitoring & evaluation frameworks and performance indicators; production of Power BI dashboards for program reporting.
