IT Operations Manager | Mobile Money & Airtel Money Expert | Digital Financial Services (DFS)

guiryambaye.vincent@gmail.com | +257 62 500 305 | linkedin.com/in/dobingarvincent

Based in Bujumbura, Burundi — Open to relocation (Chad, other countries)

PROFESSIONAL PROFILE

Certified PMP IT engineer and consultant with over 10 years of experience in IT project management, functional analysis (business analysis / MOA) and operations, including direct expertise in the telecommunications sector and digital financial services (Digital Financial Services / DFS), Mobile Money and Airtel Money. Proven experience analyzing and reconciling data from mobile network operators (MNOs) on Value Added Services (VAS) and Mobile Financial Services (MFS) activities: wallet, USSD, agent and merchant networks, KYC/AML, interoperability and payment switching. Monitoring of transactional performance indicators, coordination of technical and business teams, management of anomalies, incidents and regulatory compliance in critical transactional environments. Accustomed to coordinating multiple stakeholders, remotely and in multicultural, multi-country contexts, with a rigorous approach to continuous improvement and decision-oriented reporting.

KEY SKILLS

- **Mobile Money / Airtel Money / DFS:** Wallet, USSD, agent network, merchants, KYC/AML, interoperability, payment switching, operational monitoring of transactional platforms, operator data reconciliation (VAS/MFS), transactional performance indicators, IT governance in telecom/digital finance
- **Incident & Anomaly Management:** Identification, tracking, documentation and resolution of operational anomalies, continuous process improvement, procedure writing, regulatory compliance
- **Project Management & IT Governance:** PMP, Agile (sprints, backlog, iterations), project portfolio management, steering committees, cross-functional team coordination
- **Functional Analysis (Business Analysis / MOA):** Requirements gathering, specifications, functional specifications, technical solution definition, testing and validation of deliverables
- **Integrations & Databases:** REST API, GraphQL, partner integrations (banks, billing, payment platforms), MySQL, PostgreSQL, SQL Server
- **Application Security:** Authentication, role and session management, CORS, backend security, security requirements for transactional systems
- **Reporting & KPIs:** Dashboards, Power BI, Excel, Python, R, report automation, management reporting
- **Training & Change Management:** User training, change management support, team facilitation and coaching

PROFESSIONAL EXPERIENCE

Senior IN, VAS & MFS (Mobile Financial Services) Consultant / Data Analyst & Project Manager *July 2023 – Present*

Telecommunications and Digital Financial Services sector, Bujumbura, Burundi (on-site)

- Supervision and monitoring of VAS/MFS (Mobile Money) project activities, in coordination with technical and business teams.
- Analysis and reconciliation of mobile network operator (MNO) files — logic similar to bank reconciliation and wallet/agent/merchant transactional monitoring.
- Report automation, data structuring, KPI monitoring, support for operational decision-making and management reporting.
- Coordination of technical activities, monitoring of anomalies and incidents, documentation, continuous process improvement, in line with reliability, security and regulatory compliance (KYC/AML) requirements for transactional systems.

Independent Consultant — Digital Development & Functional Analysis (MOA), multiple engagements *2023 – Present*

Various clients, Chad (remote)

- **SNRC — Société Nationale de Recouvrement des Créances** (March 2026 – Present): Technical Consultant / Technical Architect — requirements gathering and functional analysis (MOA) for an institutional platform (React, Node.js/Express, PostgreSQL, REST API); content management, publications, FAQ and messaging modules; application security (authentication, CORS, protected endpoints).
- **Eden Business Center** (January 2026 – Present): Developer Consultant / Digital Consultant — Node.js/Express backend development, MySQL database, API and production deployment, product management, gallery, statistics, superadmin authentication.
- **Harvest Center Project — Educational platform** (April 2025 – Present): Full-Stack Developer — user platform, roles, trainers, learners, enrollments and training programs; Node.js/Express backend, MySQL database, authentication, session management, protected routes.
- **CDO Chad** (September 2024 – Present): Independent Consultant — Functional Analysis (MOA) & Digital Solutions — design of complete web platforms (frontend, backend, API, databases, admin interfaces), drafting of functional and technical specifications, Agile project management (sprints, backlog, contractor coordination), technical support and production incident resolution.

Training Consultant — Digital Marketing Training *Sept 2025 – March 2026 (Completed)*
SESA – IRC Consortium (EU Programme), Burundi

- Delivery of training programs integrating digital tools and monitoring systems; monitoring of participants and program performance.

Founder and Executive Director *2017 – Present*
Digital Business Services, Chad (remote)

- Consulting and digital solutions for SMEs; design of organizational performance monitoring systems.

Partner and Technical Project Manager *2021 – 2023 (Completed)*
SALY SYSTEM, Chad

- Design and implementation of data systems and dashboards; IT and data project management.

Secure Platform & MEAL Consultant *2021 (Completed)*
FAO Chad

- Design of MEAL frameworks and information management plans; data collection tools and monitoring indicators.
- Production of Power BI dashboards for program monitoring and reporting.

BI Analyst, Revenue Assurance, Interconnection, Business Development *2012 – 2017 (Completed)*
Millicom Tigo, Chad

- Development of SQL-based reporting systems and dashboards; automation of data analysis and anomaly detection.
- Support for performance monitoring and risk management.

KEY ACHIEVEMENTS

- Design of complete application architectures (frontend, backend, databases, authentication, admin interfaces) for several institutional and commercial platforms.
- Drafting of specifications, implementation plans and structured technical proposals to scope digital projects.
- Improved application quality through diagnostics, testing, bug fixing and API flow security.
- Deployment of professional interfaces tailored to end users, institutions, administrators and business units.

EDUCATION

Master's Degree in Computer Methods Applied to Business Management (MIAGE) — USTTB, Bamako, Mali 2010

DUT in Information Systems and Management — USTTB, Bamako, Mali 2007

CERTIFICATIONS

- PMP – Project Management Professional, PMI — 2025
- MEAL Fundamentals, DisasterReady — 2025
- Data Analysis (Excel, SPSS, Power BI), CCL Morocco — 2024

- Data Analysis with Claude (Excel, Power BI, Python and R), Eureca — 2026
- Full Stack Web Development (React, JavaScript, Node.js, Web3), Udemy — 2025-2026
